Expert opinion

Yeasticidal Activity of **Desi Wipes** in the quantitative suspension test according to DIN EN 1650:2019 (Phase 2, Step 1)

The disinfectant **Desi Wipes** was tested and evaluated according to DIN EN 1650:2019 „Chemical disinfectants and antiseptics - Quantitative suspension test for the evaluation of fungicidal or yeasticidal activity of chemical disinfectants and antiseptics used in food, industrial, domestic and institutional areas – Test method and requirements (phase 2, step 1)“.

According to the test report no. L20/1241.2 dated 25/11/2020 of Dr. Brill + Partner GmbH the preparation showed yeasticidal activity under dirty conditions.

Desi Wipes complies with the requirements of DIN EN 1650:2019 (phase 2, step 1) with the following concentration-time relationship:

Yeasticidal:	dirty conditions	100 %	1 minute
---------------------	------------------	--------------	-----------------
